

# CAMSO MTL HXD

MULTI-TERRAIN  
LOADERS

## ENHANCED DURABILITY AND PROTECTION

The multi-terrain loader solution for longer track life and better protection against drive lug failure. Increased durability combined with lateral stability minimizes operating costs by adding an extra season of service on the job site.

# CAMSO MTL HXD

## SINGLE CURE TECHNOLOGY COMBINED

- Protects against drive lug failures to add an extra season and complete tread life utilization

## HEAVY DUTY CARCASS CONSTRUCTION

- Increases lateral stability to eliminate detracking for less downtime

## VERSATILE TREAD PATTERN MATCHED WITH ADVANCED RUBBER COMPOUND

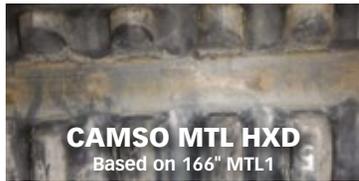

- Maintains good traction throughout tread life

| TRACK WIDTH<br>[in] [mm] |     | TRACK LENGTH<br>[in] [mm] |      | PITCH<br>[in] [mm] |     | NUMBER<br>OF DRIVE LUG | TREAD |
|--------------------------|-----|---------------------------|------|--------------------|-----|------------------------|-------|
| 15                       | 381 | 166                       | 4216 | 4                  | 100 | 42                     | MTL1  |
| 18                       | 457 | 200                       | 5080 | 4                  | 100 | 51                     | MTL2  |
| 18                       | 457 | 220                       | 5588 | 4                  | 100 | 56                     | MTL2  |
| 18                       | 457 | 201                       | 5105 | 4                  | 100 | 51                     | MTL2  |

## TREAD PATTERN

## TRACK LIFE (180 hours)

After 180 hours of aggressive testing, the standard track failed, while the Camso track continued for 20 hours more. Which means that Camso track provides at least 10% more life.
