

E

E Range Hydraulic Hammers

The Arrowhead Rockdrill E range of hydraulic hammers are designed specifically for the user that expects the quality and reliability of a market leading product but requires maximum return on investment with minimum cost of ownership. For the compact equipment sector the Arrowhead Rockdrill E range provides a powerful, simple solution that competes at the highest level but at a price that is difficult to beat.

Features of the E Range

Vibration and sound suppressed as standard

Powerful gas fired operation using less oil at lower working pressures

Heavy duty construction for the toughest jobs
